EVS

1. Chlorophyll painting – Chlorophyll, the green pigment found in plants' leaves, is a key ingredient in the process of photosynthesis. It also makes great paint!

For this project you will need:

*8 to 10 leaves

*a white sheet of paper

*a metal spoon

Tip – You can also use several branches of fresh spinach. It is discovered that it's best not to use leaves with waxy feel since they are harder to press and don't release their chlorophyll easily.

Draw a tree on an A3 size sheet and paint it green using leaves.

Make masks of any 2 animals. On an A4 sheet write about their habitats, what climatic conditions are important for their survival, etc.

2. Activity – Planets

An easy and fun way to review astronomy. All you need are pencils, paper and some scissors to get started. When you finish, you will be ready for that big solar system test - with planet facts lined up and in order!

What You Need:

1. White paper
2. Pencils
3. Scissors
4. Cotton

What you do:

1. Colour and Cut paper into PLANETS AND MOONS.
2. Make 8 planet cards and moon cards (for each of the 9 planets).
3. Glue some cotton if the temperature of the planet is cold and any other creative stuff of your choice for hot temperature.
