

HINDUSTAN INTERNATIONAL SCHOOL

**“ INDIA’S FIRST SCHOOL OF COLLABORATION,
CAREERS & CREATIVITY.”**

At Hindustan International School, we believe education must go beyond textbooks and exams. The world our children are stepping into demands more than high marks – it requires confidence, adaptability, and the ability to create meaningful change. This is why HIS proudly stands as India’s First School of Collaboration, Careers & Creativity.

At **Hindustan International School (HIS)**, education goes far beyond textbooks and exams. **Collaboration** lies at the heart of our classrooms – children work together on projects, solve real-world problems in teams, and learn empathy, communication, and leadership. From group assignments to community initiatives, we show them that success is built through the power of working together.

Equally important is preparing children for their **Careers**. At HIS, career readiness begins early with aptitude discovery, mentorship, industry exposure, and entrepreneurial challenges. By graduation, students don't just hold certificates – they carry clarity, confidence, and direction for the future.

And we never forget **Creativity**. Through art, music, dance, design, coding, and robotics, we encourage children to explore, innovate, and express themselves fully.

HIS is more than a CBSE school. It is a living ecosystem that prepares children not just for examinations, but for life – rooted in values and ready for tomorrow.

OUR 6 PILLAR FRAMEWORK

DIFFERENTIATORS THAT MAKES HINDUSTAN STAND OUT

Collaboration

COLLABORATION AS A CORE SKILL

At HIS, **working together is as important as working individually**. Through **project-based learning, group discussions, and community initiatives**, children practice empathy, communication, and teamwork. Collaboration is not occasional – it is **built into daily learning**, shaping students into leaders who succeed by **solving problems together**.

CAREER READINESS FROM EARLY YEARS

At HIS, **career readiness begins early**, not just in higher grades. Students explore **aptitude discovery, mentorship, and industry exposure**, connecting academics with real-world demands. By graduation, they gain **clarity, confidence, and leadership skills** to navigate careers, entrepreneurship, and higher studies.

SOCIAL-EMOTIONAL LEARNING (SEL)

We value **emotional intelligence** alongside academics.

HIS offers a **SEL curriculum** that builds resilience, empathy, and mindfulness. With **reflection exercises**, **peer programs**, and **supportive classrooms**, students grow into **happy, confident, and emotionally strong learners**.

CREATIVITY AT THE CENTER

Creativity is a mindset, not an activity. HIS integrates art, music, dance, theatre, design, coding, and robotics into academics, helping students **think differently and innovate**. By blending tradition with modern skills, HIS ensures creativity becomes the **spark that drives problem-solving and self-expression**.

LIFE SKILLS FOR REAL-WORLD READINESS

HIS runs a **structured Life Skills curriculum** that equips students with practical abilities needed beyond academics. From **financial literacy** and digital safety to communication, **time management**, and responsible **decision-making**, children learn skills that help them **navigate everyday life and future challenges** with confidence.

Life Skills

FUTURE-READY ECOSYSTEM

HIS blends **innovation labs**, **robotics**, and **AI assessments** with **GPS-enabled safety**, **smart attendance**, and **parent dashboards**. With **global exchanges** and **digital portfolios**, students grow as **future-ready citizens** – rooted in values, prepared for tomorrow.
